Height: 4 feet

Spread: 6 feet

Sunlight:

Hardiness Zone: 7b

Description:

A dense, compact variety that produces profuse clusters of pink flowers; bronzy-red new foliage matures to a deep glossy green, with deep maroon winter foliage; excellent groundcover, accent, or foundation shrub; tolerates heat, drought and sun

Ornamental Features

Pinkie Indian Hawthorn features showy clusters of lightly-scented rose flowers at the ends of the branches from late winter to early spring. It has attractive dark green evergreen foliage which emerges antique red in spring. The glossy oval leaves are highly ornamental and turn burgundy in the fall, which persists throughout the winter.

Landscape Attributes

Pinkie Indian Hawthorn is a multi-stemmed evergreen shrub with a mounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub, and should not require much pruning, except when necessary, such as to remove dieback. It is a good choice for attracting birds and butterflies to your yard. It has no significant negative characteristics.

Pinkie Indian Hawthorn is recommended for the following landscape applications;

- Accent
- General Garden Use
- Groundcover

Del Rey Oaks
899 Rosita Rd
Del Rey Oaks, CA 93940
831-920-1231

Seaside
1177 San Pablo Ave
Seaside, CA 93955
831-393-0400

Planting & Growing

Pinkie Indian Hawthorn will grow to be about 4 feet tall at maturity, with a spread of 6 feet. It has a low canopy with a typical clearance of 1 foot from the ground. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America.
