Plant Height: 8 inches

Flower Height: 12 inches

Spread: 24 inches

Spacing: 18 inches

Sunlight: ○ ◐

Hardiness Zone: 8a

Other Names: Princess Yentl Alstroemeria, Peruvian Lily

Group/Class: Colorita Series

Description:

This impressive selection presents stunning white blooms, with gold blotches and dramatic burgundy spots; attractive, mounded green foliage provides contrast; blooms last well as cut flowers

Ornamental Features

Colorita Yentl Alstroemeria features showy bracted white trumpet-shaped flowers with gold overtones and burgundy spots at the ends of the stems from late spring to early fall. The flowers are excellent for cutting. Its glossy pointy leaves remain dark green in color throughout the season.

Landscape Attributes

Colorita Yentl Alstroemeria is an herbaceous perennial with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and usually looks its best without pruning, although it will tolerate pruning. It is a good choice for attracting bees, butterflies and hummingbirds to your yard. It has no significant negative characteristics.

Colorita Yentl Alstroemeria is recommended for the following landscape applications;

- Mass Planting
- General Garden Use
- Container Planting

HANA GARDENS

Planting & Growing

Colorita Yentl Alstroemeria will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. Consider covering it with a thick layer of mulch in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.

Colorita Yentl Alstroemeria is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
